

Applied Behavioral Concepts, Inc.

An affiliate of New Horizons in Autism

# Community-Based Services

Neptune . Clark . Dayton . South Plainfield . Toms River

Applied Behavioral Concepts is dedicated to serving individuals on the autism spectrum in a community setting. Community-based centers are located throughout New Jersey in Monroe, Clark, South Plainfield and Neptune. The following services are available to assist in community awareness and education.

## Community Integration Program

*Specialized after school program serving school age individuals*

ABC strongly believes that extensive community involvement strengthens an individual's awareness and creates positive interactions with community members. In essence, the individuals become advocates and educators in a non-intrusive manner. Experiencing various community recreation opportunities increases a person's social awareness within society and with their peers.

## Extended Year / Summer Program

*Specialized Extended Year program serving individuals 5-21 years old*

Structured and consistent programming is beneficial for individuals with autism. As a result, ABC provides a community integrated summer program based on the goals and objectives of the individual's IEP. This program will assist in the maintenance and generalization of skills during the August break.

## Saturday Recreational Program

ABC strongly believes that all individuals with autism must receive an appropriate balance of academic and social programming. Socialization must play a pivotal role in each individual's life to ensure the development of skills and desensitization necessary to function in the community.
